

Continuous supply chain management solutions for national and global transport management.

INTEGRATION AND CONTROL

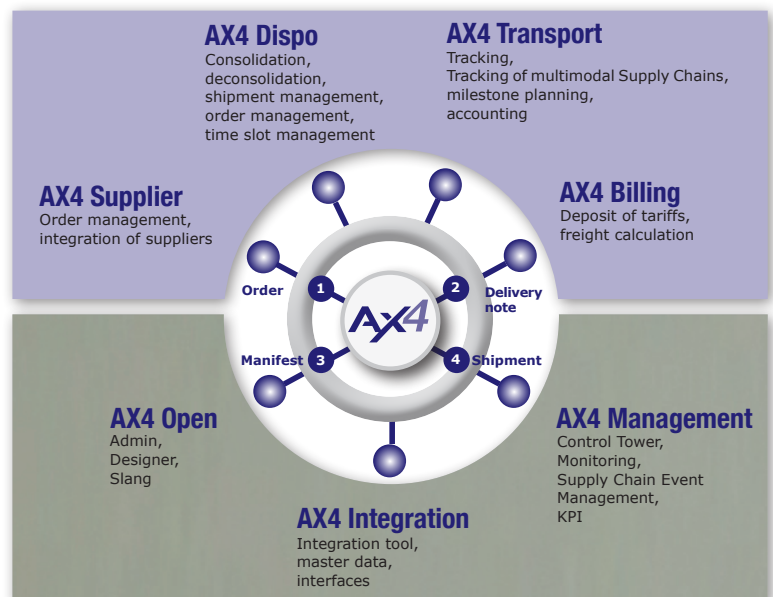

Profitable Chemical Logistics – Networked with AX4 Chemical.

AX4 Chemical is a solution specifically tailored to the chemical industry’s special requirements. AX4 Chemical offers a central cross-company platform for the exchange of shipment, tracking and billing data for manufacturers and logistics providers.

Leading chemical concerns communicate with over 400 logistics providers specializing in serving this industry through this central IT logistics platform. Due to the module’s global use all parties involved profit from a daily growing network.

AX4 Chemical offers services tailored specifically to the chemical industry’s requirements:

- Exchange of shipment, tracking and billing data
- Exchange of dangerous goods data
- Time frame controlling
- Swift connection of logistics providers
- Efficient processes with high profitability

Supply Chain Management at the push of a button: With the logistics platform AX4 you use a fully developed, centrally available IT standard solution – with maximum security and easy tools for individualisation.

AX4 Chemical is one of four industry solutions helping you to successfully manage your SCM workflows via the logistics platform AX4 – simply at a mouse click.

OPTIONS AND ADVANTAGES

AX4 Chemical – Your Options

- AX4 Chemical enables successful controlling of the entire process chain. AX4 seamlessly integrates all carriers (road, sea, air and rail) and ensures a transparent shipment progress even in the case of intermodal transports.
- AX4 Chemical makes for continuous transparency: through individual accounts all parties involved access the same data pool, e.g. updated tracking data.
- AX4 offers lead logistics functions, for example the controlling of various hauliers and carriers and thus the continuous creation of intermodal supply chains. Also the creation of reports and freight billing is possible via AX4.
- Time frame controlling: allows for the chemical shipper to make arrangements with forwarders on pick-up and delivery well in advance. This way ramp resources can be used more efficiently and waiting times can be reduced.
- AX4 Supply Chain Event Management monitors the entire process chain; parties involved are warned before problems escalate.

AX4 Chemical – Your Advantages

- High degree of customer satisfaction as information on shipment statuses can be given swiftly
- Time saving due to effortful researches being avoided AX4 gives transparency from pick-up to delivery
- Cost saving due to automated processes and the elimination of costly "rescue missions"
- Increased availability due to a permanently improved delivery service
- Contribution to company success through the integration of all parties involved in the supply chain
